CAREER OBJECTIVE

Motivated and enthusiastic Electronics and Communication Engineering fresher seeking an entry-level opportunity to apply knowledge of Embedded Systems, IoT, Arduino, ESP32, and Circuit Design. Eager to learn new technologies, contribute to innovative projects, and develop practical solutions while building a successful career in the electronics and embedded systems industry.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Communication 2023 – 2027
PPG Institute of Technology, Coimbatore | CGPA: 7.2

Higher Secondary (HSC)
Government Higher Secondary School, Tenkasi 2022 – 2023

INTERNSHIPS

CODE CORE GLOBAL HI-TECH SOLUTIONS Dec 2025 – Jun 2026

EMBEDDED DEVELOPER - INTERN

- Developed embedded and IoT-based projects using Arduino and ESP32.
- Performed sensor interfacing, circuit design, hardware testing, debugging, and system integration.

TECHVOLT SOFTWARE PVT. LTD. – Internship/Training Jul 07 – 15, 2025

- Developed Arduino-based IoT projects using ultrasonic sensors.
- Gained hands-on experience in microcontroller programming, sensor interfacing, and embedded system development.

SKILL SET

Technical Skills: Microcontrollers, Embedded C, Circuit Design, PCB Layout, Arduino, ESP32

Soft Skills: Teamwork, Leadership, Adaptability, Time Management

Tools & Technologies: KiCad, Tinkercad, Arduino IDE

AREA OF INTEREST

- Embedded Systems & IoT
- PCB Design

PROJECTS

1. Smart Home Automation System | ESP32/Arduino, Embedded C, Relay Module, Wi-Fi, Blynk

- Developed an IoT-based smart home automation system to remotely control electrical appliances using a microcontroller
- Implemented real-time monitoring and switching using relay modules, improving energy efficiency and user convenience

2. Gas Leakage Detection System | Arduino/ESP32, MQ Gas Sensor, Embedded C, Buzzer

- Designed a safety system to detect gas leakage using gas sensors and trigger immediate alerts through buzzer and indicators
- Ensured real-time monitoring and quick response to prevent hazardous situations in domestic environments

3. Smart Street Light System | ESP32/Arduino, LDR, PIR Sensor, Relay Module, Embedded C

- Developed an energy-efficient street lighting system that automatically controls lighting based on ambient light and motion detection.

4. Multi-Mode Robotic Car | DC Motors, L298N, Chassis, Power Supply

- Assembled and developed a multi-mode robotic car prototype focusing on hardware integration and mechanical design
- Worked on chassis setup, motor alignment, and wiring of motor driver modules

5. Line Following Robot | IR Sensors, Motor Driver, DC Motors, Circuit Wiring

- Built a line tracking robot by integrating IR sensors with motor driver hardware
- Focused on proper sensor placement, wiring, and mechanical setup to ensure stable movement along a predefined path

6. Smart Helmet with Airbag System | ESP32, Embedded C, IoT Integration | Hackathon

- Collaborated with a team to build an IoT-based Smart Helmet; designed an Airbag Unit for protection
- Integrated sensor data and Bluetooth communication modules

CERTIFICATIONS

1. PCB Design using Autodesk Eagle: Certified in PCB design, circuit layout, and simulation
March 2025

2. Embedded Systems Workshop: Certified in embedded systems and Arduino-based sensor interfacing
June 2025

Place: Coimbatore
